PROFESSIONAL SUMMARY

Results-driven QA Lead Engineer with 6+ years of experience delivering end-to-end quality assurance across Android, iOS, and Web platforms. Promoted to QA Lead at NanoSoftQA for demonstrated leadership, strategic test ownership, and consistent delivery of high-quality releases across mobile and web products. Proven expertise in building scalable QA processes, leading automation initiatives with Playwright and Maestro, and driving cross-functional collaboration in Agile/Scrum environments. Skilled in mentoring QA engineers, owning release cycles, and managing defect lifecycles across multiple concurrent product streams. Open to Senior QA Engineer, SDET, and Remote QA Lead roles with global organizations.

KEY SKILLS

Test Automation: Playwright | Maestro (Mobile) | Selenium | Postman Automation

API & Performance: Postman | Newman | JMeter | REST API Validation | Load & Stress Testing

Mobile Testing: Android (Multi-version) | iOS (Multi-version) | Charles Proxy | Proxyman

Web Testing: Functional | Regression | Cross-Browser | Smoke | Sanity | Exploratory | Integration | UAT

Test Management: Test Strategy | Test Planning | Test Case Design | Defect Lifecycle Management

Bug Tracking: Jira | ClickUp | Trello | GitHub Board

Methodologies: Agile | Scrum | SDLC | STLC | Manual & Automated Testing

Other Tools: Android Studio | VS Code | GitHub | JUnit | TestNG | Office 365

PROFESSIONAL EXPERIENCE

QA Lead Engineer | NanoSoftQA

December 2025 – Present

Remote, Dhaka, Bangladesh | ▲ Promoted from Software Quality Assurance Engineer

- Spearheaded end-to-end QA strategy, test planning, and release sign-off for Android, iOS, and Web products across multiple concurrent development streams.
- Established quality gates, entry/exit criteria, and STLC standards within Agile sprint cycles, reducing post-release defect leakage and improving release confidence.
- Led advanced mobile QA covering functional, usability, performance, and regression testing across device types, OS versions, screen sizes, and real-world network conditions — including offline/online transitions, dark mode, accessibility, and localization.
- Owned bug triage, severity classification, and root-cause analysis in Jira; collaborated with Engineering and Product teams to drive timely resolution and prevent release blockers.
- Utilized Charles Proxy and Proxyman for network traffic analysis, and Android Studio Logcat for crash log reproduction and root-cause investigation.
- Led, mentored, and coached QA engineers through 1:1s, structured feedback, and hands-on guidance on test design, exploratory testing, and defect reporting best practices.

- Collaborated with Product Managers, Engineering Leads, and Design teams on release readiness reviews, acceptance criteria, and quality governance across multiple releases.
- Proactively identified systemic quality gaps and drove continuous improvements in QA tooling, automation coverage, and process standards.

Software Quality Assurance Engineer | NanoSoftQA

December 2024 – November 2025

Remote, Dhaka, Bangladesh

- Executed functional, regression, smoke, sanity, and exploratory testing for Hypelist and Unfold mobile apps (Android & iOS), validating social engagement, notifications, and content-sharing workflows.
- Conducted performance testing ensuring fast load times, smooth scrolling, and stable app behavior under low battery, limited connectivity, and high user load conditions.
- Managed end-to-end defect lifecycle — documentation, severity classification, and patch verification — using Jira and Trello with structured, developer-ready bug reports.
- Created and maintained test plans, test cases, and execution reports; verified patches and updates across sprint cycles and production releases.

ICT Intervention Manager (QA) | DABI Moulik Unnayan Sangstha

February 2022 – November 2024

Naogaon, Bangladesh

- Developed and executed test plans, test cases, and scripts for agricultural and livestock management software systems, covering functional, regression, integration, usability, and performance testing.
- Validated REST API responses and backend data integrity using Postman across user management, reporting, and field-service modules.
- Tested offline/online synchronization, role-based access control, and field-use Android app behavior for low-connectivity rural deployment environments.
- Ensured compliance with organizational standards and donor-specific requirements; collaborated with developers and stakeholders to deliver timely, defect-free releases.

Executive – Data Quality Assurance | Catalyst Solutions (DBA – Adiva Graphics)

Dhaka, Bangladesh

- Performed end-to-end QA for data visualization and survey analysis tools, validating charting, tabulation, and reporting accuracy against client specifications.
- Documented defects with severity classification and actionable recommendations; collaborated with designers and developers to resolve quality issues.
- Validated data-heavy PowerPoint and Excel deliverables, ensuring chart integrity, data consistency, and presentation quality.

KEY PROJECTS

Hypelist – Android · iOS · Web

2024 – Present

Social discovery and recommendation platform for curated content lists.

- Performed functional, regression, smoke, sanity, and exploratory testing; validated user profiles, search, social engagement, and notification modules across all platforms.
- Managed defect lifecycle in Jira across sprint cycles; participated in sprint planning and release verification.

Tools: *Jira · Postman · Android Studio · Charles Proxy · Proxyman · GitHub*

ProMom – iOS

2025 – Present

AI-based pregnancy, postpartum, and child-care companion app for mothers.

- Performed functional, regression, and exploratory testing across pregnancy tracking, postpartum care, and child-care modules.
- Validated AI-based features, including personalized recommendations and conversational assistant functionality, and conducted API validation using Postman and Proxyman.
- Managed defect lifecycle in Jira across sprint cycles; collaborated with the development team on release verification.

Tools: Jira · Postman · Proxyman

Wishew – Android · iOS · Web

2025 – Present

Social gifting and wishlist management platform for creating and sharing wishes.

- Validated wishlist creation, gift contribution, sharing, and push notification modules; conducted API validation using Postman.
- Implemented Maestro automation scripts for critical user flows, reducing manual regression effort across Android and iOS releases.

Tools: ClickUp · Postman · Android Studio · Maestro · VS Code · GitHub

Dwelzi – Android · iOS · Web

2025 – Present

Real estate and property management platform for property discovery and bookings.

- Tested property listing, advanced search and filtering, property details, and booking workflows across Android, iOS, and Web.
- Verified responsive design, cross-browser compatibility, and defect resolution throughout the full release cycle.

Tools: Jira · Postman · Android Studio

Unfold – Android · iOS

2024 – 2025

Social Discovery & Content Recommendation Platform.

- Conducted functional, regression, and exploratory testing across content creation, templates, photo/video editing, feed planning, and Bio Site features.
- Executed regression and exploratory testing before each production release; verified UI/UX consistency across multiple devices and OS versions.

Tools: Jira · Postman

Shudokkho – Android

2022 – 2024

Agriculture and livestock management applications for farmers and veterinary professionals.

- Validated livestock management, farm operations, veterinary prescription workflows, and offline/online synchronization across Android devices.
- Conducted API validation and backend data verification using Postman; collaborated with stakeholders to verify business requirements.

Tools: Jira · Postman · Android Studio

Khamar Bondhu – Android

2022 – 2024

Agriculture and livestock management applications for farmers.

- Validated livestock management, farm operations and offline/online synchronization across Android devices.
- Conducted API validation and backend data verification using Postman; collaborated with stakeholders to verify business requirements.

Tools: Jira · Postman · Android Studio

Gobadi e-Haat | Web

2022 – 2024

Digital Livestock Marketplace.

Tested livestock listing, seller/buyer registration, search and filtering, and marketplace transaction workflows for an online agricultural trading platform.

Validated role-based access control and business process workflows for distinct user groups (farmers, sellers, buyers).

Tools: Jira · Postman

EDUCATION

M.Sc. Engineering in Computer Science & Engineering

December 2023

Islamic University, Kushtia | CGPA: 2.94 / 4.00

B.Sc. Engineering in Computer Science & Engineering

February 2019

Bangladesh University of Business & Technology (BUBT) | CGPA: 3.55 / 4.00
